

# WORKPLACE SAFETY

## KNOW WHEN TO SAY WHEN – KNOW WHEN TO STOP WORK

While **qualified electrical line workers** and **electricians** are often willing to go above and beyond the call, some jobs require **specific knowledge and experience**. That's why it's important to **stop and reassess** a situation if there is ever doubt about a job's task or a procedure's requirement. As qualified electrical workers, it is our jobs to ensure all trades are aware of **danger** related to **unqualified electrical work**.

### ALWAYS ASK YOURSELF:

1

Have I been properly trained to safely complete this job task?

2

Have I worked on this task before, and do I have the right training and experience?

3

Do I have the proper tools for this job?

4

Is the hierarchy of risk controls being followed to ensure that preventive and protective risk controls are being implemented?

5

Has a proper risk assessment been performed?

6

Are all conductors and circuit parts in an electrically safe working condition?

7

Are these parts properly guarded to reduce the likelihood of electrical contact or arcing faults?

8

Are all applicable procedures and job planning procedures completed?

9

Am I confident about completing this job without risk or putting others at risk?

**KNOW WHEN TO SAY WHEN – IT CAN SAVE YOUR LIFE, AND THE LIVES OF THOSE WORKING WITH YOU.**
