

LOOK. LISTEN. LEARN.

Be aware.
Fire can happen anywhere.

The National Fire Protection Association states that **4 out of 5** U.S. fire deaths occur in the home. **Look**, **Listen**, and **Learn** how you can prevent deadly fires.

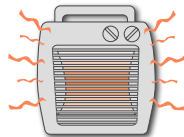

LOOK

Top three causes for home fires:

- 1 Cooking Equipment**
Cooking accounts for **47%** of fires, and **20%** of fire related deaths

- 2 Heating Equipment**
Heating accounts for **15%** of fires and **19%** of fire related deaths

- 3 Electrical**
Electrical accounts for **9%** of fires, and **18%** of fire related deaths

LISTEN

2/3 of fire deaths occur in homes with **missing** or **non-functioning** smoke alarms

Remember to:

Test smoke alarms **monthly**

Change battery **yearly**

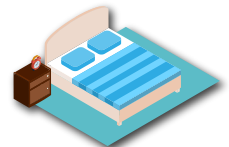

Replace alarm every **10 years**

Install smoke alarms in:

Every **bedroom**

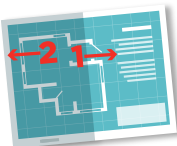

Outside every sleeping area

On **every level** of your home, including basement

LEARN

- 1** Learn **two ways** out of every room.

- 2** Have a qualified electrician inspect your electrical system **every 10 years**.

- 3** Have a qualified electrician install **AFCI breakers** and **receptacles**. The CPSC estimates that **50%** of electrical fires can be prevented with AFCIs.

- 4** Extension cords cause an estimated **3,300** home fires a year. **Never** use them as permanent wiring.
