

NATIONAL ELECTRICAL CODE:

Your Guideline to Safety

First published in 1897, the **National Electrical Code** has been adopted in **all 50 states** as the standard for safe electrical installation, inspection, and use to protect people and property from **avoidable electrical hazards**.

There have been **15 code revisions** since **1974**, the year the average American home was built.

The National Electrical Code (NEC) is updated **every 3 years** to include the latest in proven safety technology.

The NEC creates a **universal electrical safety standard**. Allowing all new and renovated construction built to code to be **safe from electrical hazards**.

The NEC applies to **new construction and renovations**. The code is only in effect after it is adopted by the state or local jurisdiction.

Is your home up to code? Contact a **qualified electrician** to ensure your home is **safe and up to code**.

MAY IS NATIONAL ELECTRICAL SAFETY MONTH
